DeployAI 2026

Winter School on Deployable AI: From Foundational Models to Real-World Intelligent Systems

7 – 22 December, 2026

Venue: IIT Ropar

Organized by
School of Artificial Intelligence and Data Engineering
Indian Institute of Technology Ropar

Learn Build Deploy Impact

Registration Details

Type of Participant	Early Bird (Online)	Early Bird (Offline)	Late (Online)	Late (Offline)
Student / Research Scholar	₹ 2,000	₹ 12,000*	₹ 2,500	₹ 14,000*
Faculty Members	₹ 3,000	₹ 15,000*	₹ 4,000	₹ 17,000*
Industry Participant	₹ 6,000	₹ 20,000*	₹ 8,000	₹ 22,000*

- ▶ Accommodation, Food, and GST are included in the Registration Fee.
- ▶ **Last Date of Registration: October 05, 2026** (Limited Seats Available)
- ▶ The participation fee can be paid through the SBI Collect payment link or by scanning the QR code provided. After successful payment, participants must complete their registration by filling out the form at: <https://forms.gle/ao5MsT6oL2KHWAZe6> and retain the payment receipt for reference.

Bank Details

Account Name : IIT Ropar Revenue Account
Account No. : 37360100716
Bank MICR Code : 140002008
Bank IFSC Code : SBIN0013181
Bank Name : SBI
Branch Name : SBI, IIT Ropar Branch
Email ID : accounts@iitrpr.ac.in

DeployAI 2026

Winter School on Deployable AI

From Foundational Models to Real-World Intelligent Systems

**AI for
Society**

About DeployAI 2026

Artificial Intelligence is rapidly transforming industries, research, and society. While advances in foundation models, large language models (LLMs), and generative AI have accelerated innovation, one of the biggest challenges today is translating these models into reliable, scalable, and production-ready intelligent systems. There is a growing demand for professionals who can not only develop AI models but also deploy, optimize, and manage them in real-world environments.

DeployAI 2026 is a 14-day Winter School on Deployable AI Systems designed to bridge this gap. The program provides a hands-on learning experience covering the complete AI lifecycle — from machine learning and deep learning to foundation models, LLMs, MLOps, and cloud-native deployment. Participants will gain practical experience with industry-standard tools and frameworks while building end-to-end AI applications ready for real-world deployment.

DeployAI 2026 aims to prepare students, researchers, faculty, and industry professionals with the knowledge and skills required to build the next generation of deployable, scalable, and trustworthy AI systems.

Why Attend DeployAI 2026?

Learn to transition AI models from research prototypes to production-ready and deployable applications.

Gain hands-on experience in model development, model conversion, optimization, Transformers and LLMs, Computer Vision, and Edge AI.

Develop practical AI deployment skills through hands-on labs covering inference, Agentic AI, AI APIs, containerization, MLOps, and real-time AI applications.

Learn from leading experts and earn a certificate of participation.

Target Audience

- ▶ Students, Research Scholars
- ▶ Faculty and Educators
- ▶ Industry Professionals and Startups
- ▶ Employees of R&D organizations

Patron

Prof. Rajeev Ahuja
Director, IIT Ropar

Course Coordinators

Dr. Rakesh K. Sanodiya, IIT Ropar
Dr. Abhinav Kumar, IIT Ropar

Course Co-Coordinators

Dr. Santosh Kumar Vipparthi, IIT Ropar
Dr. Vandana Bharti, IIT Ropar

Course Mentors (ACADEMIA)

Prof. Chetan Arora, IIT Delhi
Prof. Tanmoy Chakraborty, IIT Delhi
Prof. Bapi Raju, IIIT Hyderabad
Dr. M. Khushi, Brunel University London
Dr. S. Murala, Trinity College Dublin, Ireland

INDUSTRY

Dr. Ramasuri Narayanam, Adobe
Mr. Gagan Jain, Microsoft AI
Mr. Haroon Ansari, LinkedIn
Mr. Siddharth, Zoox, USA
Mr. Rahul Agrawal, Samsung
Mr. Anirudh Kumar, EPAM Pvt. Ltd.
Mr. Rahul Pathak, UnitedHealth Group

Local Organizing Committee

Dr. Abhilasha Nanda, IIT Ropar
Dr. Anubha Prakash, IIT Ropar
Dr. Puneet Kumar, IIT Ropar
Dr. Tanushree Meena, IIT Ropar

Topics (Tentative) Covered in DeployAI 2026

Day	Module	Hands-on / Key Outcomes
1	AI Engineering & Deployable AI Ecosystem	Explore domain adaptation and post-training techniques for small language models.
2	Python for AI & Data Processing	Process, clean, visualize, and prepare AI data using Python.
3	ML/DL Fundamentals for Deployment	Train, evaluate, save, and perform inference with a small ML/DL model.
4	From Training to Inference	Build an inference pipeline and compare training vs. inference.
5	Model Conversion & Interoperability	Convert a PyTorch model to ONNX and run inference with ONNX Runtime.
6	Model Optimization for Deployment	Optimize a model and compare size, latency, and accuracy.
7	Transformers and LLMs	Run a small Transformer/LLM and benchmark inference performance.
8	Agentic AI & Agentic Workflows	Build an AI agent that selects and uses tools to answer queries.
9	Edge AI Hardware	Deploy an AI model on Jetson and monitor CPU/GPU/memory utilization.
10	Real Time Computer Vision on Edge	Deploy real-time object detection on edge hardware using a live camera/video stream.
11	AI APIs & Application Deployment	Build a FastAPI-based AI inference API and return predictions as JSON.
12	Containerized & Scalable AI	Containerize and test an AI application using Docker.
13	MLOps and Production AI	Build a mini MLOps pipeline with MLflow.
14	Capstone: End-to-End Deployable AI	Build and demonstrate an end-to-end AI deployment pipeline.
